

Schuyler Ng

Frontend Engineer

Quezon City, NCR • schuylerng@gmail.com • 0917 843 2312 • linkedin.com/in/schuyler-ng

SUMMARY

Frontend engineer with 3+ years of experience shipping production-grade web and mobile applications across startup and enterprise settings. Focused on writing clean, maintainable code and building component systems that scale. Experienced working across full feature cycles — from architecture decisions to release — and comfortable collaborating with design, backend, and product teams.

EXPERIENCE

Samsung R&D Institute Philippines • Taguig City

Frontend Engineer • Full-time Feb 2025 – Mar 2026

- Shipped features across 5 consecutive product releases (v3.31–v3.35), covering both new development and regression fixes each cycle.
- Redesigned the multilingual feature architecture by building a centralized form wrapper, cutting the effort needed to add or modify any language-related feature from multiple touchpoints down to one component.
- Eliminated duplicate API calls across the admin panel, reducing redundant network requests and improving page load performance.
- Migrated global state from localStorage to Redux Toolkit, improving state predictability and making the codebase easier to debug and extend.
- Cleared a backlog of tech debt during downtime — standardized hardcoded values across 40 files and consolidated repeated UI patterns into shared components, making the codebase more consistent and easier to maintain.
- Recognized as Team Member of the Month (November 2025) for consistent output and contributions to team delivery.

Sarisuki Stores Inc. • Muntinlupa City

Software Engineer / Front-End Consultant • Full-time & Part-time Oct 2022 – Jan 2025

- Led a team of five in integrating a third-party rewards platform, coordinating between vendors and internal teams to deliver the feature on schedule.
- Built an admin portal from scratch using Vue.js and Tailwind CSS that improved internal invoicing efficiency by 75% within five months of launch.
- Developed a PWA from the ground up using Next.js, TypeScript, Tailwind CSS, and Capacitor — integrating Google Maps, Algolia search, and SMS OTP into core user flows.
- Reworked the UI of a high-traffic e-commerce platform during a full rebranding, working directly with the design team to make sure the new look shipped consistently across all pages.
- Set up a user engagement tracking system for mobile that fed directly into product decisions, giving the team clearer visibility on how users were actually using the app.

Infor PSSC Inc. • Taguig City

Associate Software Engineer • Full-time Mar 2022 – Sep 2022

- Contributed to backend bug fixes in Java and refactored legacy modules, improving stability and reducing maintenance load.
- Assisted in optimizing a mobile supply chain app through structured testing and feedback cycles.

PROJECTS

Mel's Collection Website Mar 2021 – Jan 2022

- Built a personalized e-commerce site using Next.js, Tailwind CSS, and Headless UI with a focus on performance and consistent component design.
- Implemented lazy loading across the site, improving load times and SEO metrics.

Tagalog Transformer Website • tinyurl.com/Tagalog-Transformer Apr 2021 – Sep 2021

- Developed a web interface to showcase an NLP chatbot model built for an undergraduate thesis, with a focus on intuitive navigation and responsiveness.

Intercon Regenerative Center Website • tinyurl.com/Intercon-Regenerative-Center Mar 2020 – Mar 2021

- Built a healthcare service website using Vue.js with styled-components, incorporating stakeholder feedback through multiple iterations to align with business goals.

EDUCATION

Bachelor of Science in Computer Science

De La Salle University Manila Sep 2017 – Sep 2021

AWARDS & RECOGNITION

Team Member of the Month — Samsung R&D Institute Philippines November 2025

Best Paper Award — 2022 International Conference on Asian Language Processing October 2022

Best in Project Implementation – National Service Training Program — COSCA, De La Salle University Manila September 2018

Outstanding Junior Officer — La Salle Computer Society, De La Salle University Manila February 2018

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Vue.js, Redux Toolkit, Zustand, Pinia, Tailwind CSS, PWA

Mobile: Flutter, Capacitor, Ionic

Backend & Tools: Node.js, Python, Django, Java, C, Git, Jenkins, Postman, MongoDB, MySQL

Methodologies: Agile, Scrum, Kanban, CI/CD
